Nomena Andrianiana

Software Engineer — Java / J2EE / Spring Boot & Full Stack JavaScript

Email: nomenaf.pro@gmail.com | Phone: +261 34 43 831 15 | Antananarivo, Madagascar
Portfolio: andrianiainafn.vercel.app | GitHub: github.com/andrianiainafn | LinkedIn: linkedin.com/in/nomena-andrianiaina-09b3a8267

PROFESSIONAL SUMMARY

Developer with over two years of experience in Java/Spring Boot on production backend architectures (REST APIs, microservices, relational databases). Complements this expertise with Full Stack JavaScript/TypeScript skills (React, Next.js, Node.js). Comfortable across the full development cycle, from design to production, with a strong focus on code robustness and quality. Graduated top of class in Computer Science.

KEY ACHIEVEMENTS

- Designed REST APIs shared across 3 internal applications, handling over 10,000 requests per day.
- Automated Docker/CI-CD deployments, cutting release time from 45 minutes to under 5 minutes.
- Built a modular hexagonal architecture supporting over 10 partner web-radios.
- Developed a mobile application connected to a Java Spring Boot backend, used by over 200 users.
- Designed microservices exchanging data across 5 application modules for a government client.

PROFESSIONAL EXPERIENCE

Full Stack Java & JavaScript Engineer — Alfa OI

MAY 2026 – PRESENT

- Built 6 full-stack application modules in JavaScript/TypeScript, from design to production deployment.
- Designed documented REST APIs consumed by 3 internal applications.
- Automated containerized deployments, cutting release time from 45 minutes to under 5 minutes.

Technologies: Next.js, TypeScript, Node.js, Java, J2EE, PostgreSQL, Docker, CI/CD

SEO Optimization Specialist — Claude Agency (Remote, part-time)

AUGUST 2026 – OCTOBER 2026

Contributed to improving the organic search ranking and visibility of websites through various optimization actions:

- On-page SEO: improved page titles, meta descriptions, HTML tags, and page content.
- Keyword research and analysis to improve search engine rankings.
- Technical SEO: page structure, indexing, and content accessibility.
- Tracked performance and indexing with Google Search Console.

Skills: SEO Audits, On-page SEO, Technical SEO, Keyword Research, SEO Copywriting, Link Building, Google Search Console

Full Stack Developer — Webradio.ai (France, remote)

FEBRUARY 2025 – FEBRUARY 2026

- Built web applications for over 10 partner web-radios on a modular hexagonal architecture.
- Built and optimized REST APIs integrating 4 third-party services, ensuring scalability and reliability.
- Implemented reusable components and unit tests, reducing regressions by 30%.
- Collaborated with technical teams on performance and user experience.

Technologies: Next.js, TypeScript, Prisma, MySQL, API REST

Full Stack Java / React Developer — Freelance

NOVEMBER 2024 – JANUARY 2025

- Built a web and mobile application connected via iBeacon, used by over 200 users.
- Implemented geolocation and real-time communication with Ably (sync in under 2 seconds).
- Delivered real-time sync between web and mobile platforms via centralized backend services.
- Managed the full development cycle, from design to production deployment.

Technologies: Java, Spring Boot, React Native, Next.js, TypeScript, Ably, PostgreSQL

Java / Mobile Developer Intern — Orange Madagascar

JULY 2024 – NOVEMBER 2024

- Built a tourism application cataloguing over 50 sites, hotels, and parks in Madagascar.
- Designed an intuitive interface featuring 360° image display.
- Integrated geographic databases (PostGIS) and multimedia content.

Technologies: Java, Spring Boot, React Native, PostgreSQL, PostGIS

Java Spring Boot Developer Intern — Ministry of Economy and Planning

AUGUST 2023 – NOVEMBER 2023

- Built a collaboration application for task management and internal communication.
- Implemented microservices with inter-service communication via Feign, across 5 application modules.
- Designed robust REST APIs for data exchange between modules.

Technologies: Java, Spring Boot, Feign, PostgreSQL, Microservices

PROJECTS

GMI — IT Equipment Management

- Equipment tracking and management application, used by over 50 employees.
- Real-time tracking, staff assignment, requests, and equipment maintenance.
- Role and permission management for a secure workflow.

Technologies: Next.js, Spring Boot, PostgreSQL, NextAuth

TrackLyst — Personal Budget Tracker

- Mobile app for tracking budget and expenses, with real-time data sync.
- Authentication and storage powered by Supabase.

Technologies: React Native, Supabase

Chaaat — Social Network

- Social network with profiles, posts, and real-time messaging.
- REST API and NoSQL database for user and content management.

Technologies: MongoDB, Express.js, React, Node.js

TECHNICAL SKILLS

Languages
Java, TypeScript, JavaScript (ES6+), SQL

Java / J2EE Backend
Spring Boot, Spring Security, Spring Batch, Hibernate (JPA), Microservices, API REST

Full Stack JavaScript
Node.js, Express.js, NestJS, React.js, Next.js, Redux, Tailwind CSS

Mobile
React Native, Clean Architecture

Databases
PostgreSQL, MySQL, MongoDB, PostGIS, Redis, Prisma ORM

DevOps and Tools
Git, GitHub Actions, Docker, Docker Compose, CI/CD, Nginx, Linux, Maven, Gradle, Postman

EDUCATION

Master's Degree in Computer Science — National Institute of Computer Science, University of Fianarantsoa, 2026
Bachelor's Degree in Computer Science, Top of Class — National Institute of Computer Science, University of Fianarantsoa, 2024

CERTIFICATIONS

English Certificate B2 — English Language Institute, 2025
Data Science — Idea Academy, 2025

LANGUAGES

French — Fluent | English — Professional working proficiency | Malagasy — Native
